| Broad Vision | ●●●●● |
| Experience and performance under pressure and urgency | ●●●●● |
| English Language | ●●●●● |
| Proficiency and proactivity in learning | ●●●●● |

Notable Activities

- Full Stack Web, comprehensive understanding of development, hosting, design, support, and client communication. Proficiency in PHP, JavaScript, jQuery, HTML+CSS+Bootstrap programming, with numerous systems built from scratch;
- Years of experience with Git and Github;
- After assuming the role of manager, within three months, there was a 95% reduction in customer complaints, ticket openings, and bugs;
- Instruction of at least 12 interns with no prior knowledge of business and programming to a level of broad knowledge and autonomy in the job market;
- Management of high-risk databases (MySQL, Oracle), including maintenance, configuration, data entry, and advanced queries;
- Advanced knowledge of port business and operational systems, from operational procedures, sense of urgency, to database structures, systems, and hosting. Including basic understanding of integrated invoicing with the Federal Revenue Service;
- Ability to analyze situations and provide quick and practical solutions even under extreme pressure and urgency.
